Portfolio: https://www.talharashid.com

SUMMARY:

Results driven Software Engineer with **5 years** of experience architecting scalable SaaS platforms, high performance REST APIs, and enterprise CRM systems. Specialized in Laravel and Django ecosystems with strong expertise in database optimization, system migrations, and third party integrations including Stripe and Google APIs. Proven record of improving system performance by 30%+ and delivering production ready solutions that scale. Focused on clean architecture, maintainable code, and long term system reliability.

Technical SKILLS:

Programming Languages: PHP, Python, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: Laravel, Django, Fast API, React.js, Vue.js, Inertia.js, jQuery

UI & Styling: Tailwind CSS (v3.3+), Bootstrap 5, Material UI, Responsive Web Design

Front-End Development: DOM Manipulation, AJAX, RESTful API Integration

Back-End & Database: MySQL, PostgreSQL, MVC Architecture, Database Optimization, Authentication & Authorization, API Development

Version Control & Tools: Git, GitHub, Composer, NPM, Postman, Jira

Development Methodologies: Agile, SDLC, Debugging, Project Management

PROFESSIONAL WORK EXPERIENCE:

Organization: Zap Power FZCO
(Electricity and Batteries Provider Company)
Tenure: 09/2023 – Present
Designation: Software Developer

Responsibilities:

- Develop and maintain the backend infrastructure of mobile application, ensuring optimal performance, reliability, and scalability.
- Collaborate with cross-functional teams, including frontend developers, designers, and product Managers, to translate app features and requirements into efficient backend solutions.
- Integrate and manage various third-party services, APIs, and payment gateways to enable smooth transactions and interactions within the app.
- Design and implement a robust database management system to securely store data.
- Develop and maintain APIs for communication between the frontend and backend components of the app, allowing seamless data exchange and user interactions.
- Integrate Google Maps API services to enable real-time and accurate location-based services.
- Implement push notification services to keep customers informed about delivery updates, energy usage insights, and subscription status changes.

Achievement:

- Designed and maintained a feature-rich admin panel that enhanced operational efficiency, allowing seamless management of customer accounts, orders, subscriptions, and energy systems.

- Developed and maintained APIs, enabling real-time data exchange between frontend and backend components, leading to improvement in user engagement.
- Seamlessly integrated multiple payment gateways, improving subscription plan management and ensuring 100% secure payment processing.
- Implemented push notification services, boosting user engagement through timely updates on Delivery status, energy usage insights, and subscription changes.
- Designed and developed RESTful APIs for App Backend.

Organization: **Optimum Tech**
(IT Company)
Tenure: 08/2022 – 06/2023
Designation: Laravel Developer

Responsibilities:

- Developing web applications using Laravel framework.
- Integrating third-party services and APIs.
- Utilizing version control system for code management and collaboration.
- Continuously improve coding skills and contribute to the team's development processes.
- Implement security measures to protect web applications from vulnerabilities.
- Debugging and troubleshooting issues to ensure smooth application functionality.
- Designing and implementing database schemas and writing queries.

Achievement:

- Optimized website performance by reducing page load times by an average of 30%.
- Diagnosed and fixed website issues promptly, improving overall website stability.
- Successfully converted Laravel 5 project into Laravel 9.
- Designed and developed RESTful APIs for App Backend.
- Developed Employee, HR and management systems for Housing Society Project.

Organization: **RANK VISELY**
(IT Company)
Tenure: 04/2021 – 08/2022
